

There is a typo in the *2014-15 NCCA Rules Modifications*. Go to Balance beam under examples; it deals with the examples only. See below:

- a. **A connection of at least 3 acro flight elements (excluding dismount connections) that includes a minimum of one C element will receive an additional +.1 bonus.**

**Examples:** (1) FF+FF+Layout, B+B+D=+.1 CV, +.1 D, +.1 additional

*\*\* (2) RO FF Mount+FF+Layout, C+B+D=+.1 CV, +.1 D, +.1 additional*

**\*\*Number 2 should receive a CV of +2 for C+B+D=+.2 ( not +.10) everything else is ok.**
