Answer Sheet

General

1. i. The only judge who is NOT affiliated is one whose child is a recreational gymnast at a competing club. Thankfully—so judges' children can in fact do basic gymnastics without causing affiliation to that judge.
2. i. Gymnast giving technical verbal clues to her own teammate is NOT a CJ deduction. Coach going on the FX mat to remove a scrunchie that flew off the gymnast's head is also NOT a CJ deduction.
3. a. Beam routine that is less than 30 seconds is 2.0 deduction. No music on floor 1.0, incorrect attire 0.2, incorrect apparatus specification 0.3, fail to mark floor boundary 0.1
4. h. None of these choices is correct. If judge on 4-judge panel misses a routine, her score is the same as the score of the highest of the other judges and an average is calculated as normal. A coach may see all the scores and start values of all the judges. Inquiries must be submitted within 5 minutes of the end of the event rotation and can only include flat compositional errors. And finally, a chief judge cannot and should not call a conference except for the scores being out of range or if an impossible SV has been awarded.
5. e. The two middle scores are 7.9 and 8.65 which averages to 8.275. HOWEVER, they are 0.75 apart. Therefore, the chief judge needs to call a conference as the range of scores for an average in the 8's is 0.7.
6. d. 9.8. She has 7 elements in total but needs 8 elements total. We use the E to replace a missing B, so she is short an A. Calculation: $9.5 - 0.1(A) + 0.2(E) + 0.2(CV) = 9.8$
7. c. 0.6 ^0.1 Arm Swings, ^0.2 Pikes down (insufficient stretch), ^0.3 bent legs

Vault

8. c. Gymnast can do 2 more vaults; CJ deducts 0.5 from the next one (don't score the vault she did without being signaled)
9. d. 0.9 ^0.1 feet, ^0.3 hip angle, ^0.5 LA turn begun too early (Note that the hip angle and LA turn deduction have CHANGED since the prior Code)
10. b. Late completion of twist in second flight phase is ^0.3 deduction. There is no longer a deduction listed for LA turn begun too late in the second flight phase. Incomplete LA turn on first flight phase is ^0.3. LA turn too early in support/repulsion phase is ^0.5 and insufficient exactness of LA turn in second flight phase is ^0.1
11. True. This is a new deduction so I thought I'd give you one relatively easy question to help you remember it.
12. j. both b. and d. are correct. a. If coach spots during vault, it is void. c. gymnast has 3 tries to get over vault and get a score so her score is 9.3. e. it's ok for coach to be in between board and vault table on Yurchenkos. f. deduct only for the fall
13. c. 0.7 Up to 0.3 dynamics, Up to 0.1 each on first and second flight for feet and up to 0.2 for shoulder angle
14. a. 0.7 Up to 0.3 direction, Up to 0.2 incorrect body posture, Up to 0.2 trunk movements to maintain balance

Bars

15. a. This is new—that a cast to HS or a short cast prior to the same element is considered a different connection. Good luck with the shorthand on that! b. only gets credit 2x's c. only once d. Gets no value & no SR e. Gets no VP and therefore no CV bonus
16. c. 2 Facing same direction throughout exercise and performing one of three requirements (Min "B" Forward, Min "B" 3/6/7 and min "C" turn) are each flat 0.1 deductions. Lacking two bar changes is flat 0.2 deduction. Gymnast can cast squat on after a fall and no longer gets deduction for more than 1 squat on—remember this as it is NEW this code!
17. d. 3 All are "D's" except the Ricna-straddle (which is like a Tkatchev only from stalder position) which is an "E"
18. d. Since she was unsuccessful the first time, she gets VP and D bonus the second time. I am trying to confuse you—the SR is two DIFFERENT releases and she got the SR by touching the bar the first time so she needs a second DIFFERENT B or better flight element and I didn't give you enough information to know if she did that or not.
19. g. a Giant 1 1/2 turn is a "D" and a toe on front salto tucked or piked with 1/1 twist dismount is also a "D." The other skills listed are "E's."
20. b. D + E + 0.2 CV

21. c. D + C + C +0.1 CV total (the +0.1 CV is for the D + C. The C+C into dismount gets NO CV as there is not turn or flight in the clear hip to handstand. Did I trick you?)
22. d. 0.7 Legs apart up to 0.2, Amplitude of release skill up to 0.2, Bent arms up to 0.3
23. f. It's 0.5 for the third run approach to mount/touch springboard without mounting. a. 0.2, b. ^0.4, c. 0.4 maximum for steps, d. squat on landing ^0.d, e. Hitting mat with feet 0.3
24. c. 9.9. While she has 0.5 in D or E bonus, she has no Connective Value so her maximum start value is 9.9.
25. g. a. and d. are correct. Hop grip change to a reverse grip must be completed prior to initiation of the turn to be considered flight element. Giant circle backward hop 1/1 turn is an exception and CONSIDERED a flight element. A hop-grip change to a reverse grip, followed by a $\frac{1}{2}$ turn (180°) is considered ONE element.
26. D. 0.8 Maximum of 0.5 for 2 extra swings following one element, 0.2 for hitting bar, 0.1 for landing too close to bar on dismount.

Beam

27. a. is correct. Note that choreography in 2/3 directions incurs no deduction (a change). Rhythm & tempo throughout exercise is up to 0.2. Relaxed footwork on non-value parts throughout exercise is now ^0.3. And Body alignment/position/posture on non-value parts throughout is ^0.3
28. d. 3. The aerial round-off is an "E." The rest of skills listed are "D's."
29. a. Failure to remove mounting apparatus after mount is 0.3 CJ deduction. Warming up on mat after fall is 0.2, overtime is 0.1 and coach standing next to beam throughout is 0.1
30. b. Turn is completed when the support foot and hips have reached 360° rotation and the free leg touches the beam (not 270°)
31. f. D+C +0.2 CV bonus. (Note this is a change—that mounts can count in a 2 acro flight element series)
32. f. c. and e. There is no longer a definition of artistry as originality and well, frankly, e. was just a giveaway answer.
33. e. 4 The full turn with hand holding leg in split is "C" value; the rest are "E's."
34. a. 0.55 (0.1 for lacking 2 different acro directions, 0.1 for doing more than 2 straddle jumps, 0.05 flexed feet, ^0.3 for direction on gainer salto dismount off end of beam)
35. a. Deduct 2.0 chief judge deduction for incomplete exercise less than 30 seconds so $6.1 - 2.0 = 4.1$
36. i. a., c. and d. are correct. A front salto tucked $\frac{1}{2}$ turn dismount is an "A." A salto backward tucked across the beam is an "E." A jump or dive to handstand and hold for 2 seconds is a "B."
37. c. 9.9. The switch leg leap mount is a "D," the flic-flac $\frac{1}{4}$ turn to handstand is "E" and the Double turn holding leg in 180° split is an "E." Remember, she also needs CV, so her SV is $9.5 + 0.4$ (D and E bonus) = 9.9.
38. e. 4 All elements listed are "B's" EXCEPT the dive roll mount is a "C." Note that the dive cartwheel and the round-off are considered different elements.

Floor

39. d. 0.15 for failing to perform SALTOS in 2 different directions. She has only backward saltos. (Note that this definition is a change from the last code). She also gets a 0.05 deduction for choice of salto elements not up to the competitive level—she has 3 tumbling passes with a D, D and a direct A+C. In the chart in Appendix 15, this is a .05 compositional deduction so the total is 0.15. Whew—that was harder than most questions!
40. d. 0.65 Lack of B turn 0.2, No C salto 0.3, Fail to hold end pose 1 second 0.05, Concentration pause 2 seconds or more 0.1
41. b. Footwork throughout is ^0.3. Synchronization of music at end of routine 0.1, turns not in relevé' ^0.1, Leg separations ^0.2, Twists on acro ^0.2, Height on aerials ^0.2
42. h. None of the deductions listed is correct. Absence of music is 1.0, Music with whistles or animal sounds is No deduction (1.0 deduction if words), Exercise shorter than 30 seconds 2.0, Coach on FX mat at Level 10 is 0.5, Overtime is 0.1, and gymnast with any part of body out of bounds is 0.1 (you're thinking perhaps of FIG rules where 1 foot out versus 2 feet out is a different deduction.)
43. d. B + C + 0.1 CV Note that this is NEW for Indirect Acro Connections and we are likely to see some interesting combinations become more common.

44. e. 0.5 Variety in choreography is part of artistry and is 0.05-0.1, Feet apart on landing dance jump ^0.1, Dance precision ^0.1, Dynamics ^0.2
45. e. 4 All are "D's" except the full twisting Shushunova is a "C."
46. a. Poor relationship of music and movement throughout exercise is ^0.3. Synchronization of music with ending pose 0.1, Incorrect rhythm during direct connections ^0.1 and Insufficient variation in rhythm and tempo throughout the exercise ^0.2
47. e. 10 + 0.1. She has enough difficulty (9 elements—use the D and the E to replace the missing B and C). So, 9.5 + 0.3 in D/E bonus + 0.3 in CV. Her "E" is an acro skill (full twisting double back) so she is eligible for the + 0.1.
48. c. + 0.2. Apply the direct bonus first—C + A + 0.1. Then the indirect B + C (using the C twice) for + 0.1 so a total of 0.2
49. i. 1.0. Body alignment/position/posture on non-VPs throughout ^0.3, Legs not parallel ^0.2, Height of acro ^0.3, Incomplete twist on acro ^0.2
50. j. The triple turn in tuck stand on one leg is an "E." The rest are "D's."
